

# TALON TECHNICAL SALES, INC.

Your Physical Measurement Specialists

Your Physical Measurement Specialist for Pressure.

**TALON Pressure Transmitters** for sensor solutions in industrial, oil & gas, automotive test stand, aero-space, military, injection molding and sanitary marketplace.

TALON represents manufacturers of pressure, level, and temperature transmitters and transducers.

Accommodating and supplying pressure instrumentation for industrial applications from .5 Inches WC to 150,000 PSI.

**Pressure Transmitters & Differential Pressure Transmitters** for highly precise and accurate measurement of pressure, differential pressure, and flow rate. Compact design, high accuracy and performance, long-term stability.

For high temperature and high vacuum Fuji Electric's special treatment for remote seal transmitters enables stable measurement for temperatures up to 200 C at 0.27 kPa abs.

**Level Transmitters** for clean water, sewage water, well, river, etc. TALON offers highly accurate level measurement. We offer level measurement from 1.5m to 50m.

Accuracy as high as +/-0.2%. Powerful arrester built-in, both detector and connector terminal are equipped with a lightning arrester to secure reliable lightning protection. Remotely adjustable, transmitter is remotely adjustable with a hand-held communicator.

Allowable overpressure is up to 2 times the maximum measuring range.
